

1. Sit down in the car and hold the brake pedal to the left (and the key in your pocket)
2. Push the orange button (on)
3. Wait until the dashboard appears (goes up, down and up again takes some time)
4. Hold the brake pedal and set the gear in D (drive) or R (racing, eh, Reverse, old Belgian joke)
5. Give "gass" with the pedal to the right, and drive carefully, I only say this once...
6. Hold the brake pedal after driving, set the gear back in P(arking)
7. Release the brake pedal, push button 2 again (off)
8. That's all, folks :)
